MEDICAL LABORATORIES

ELECTROPHORESIS

Creighton Medical Laboratories will be changing to a new and improved method for serum and protein electrophoresis starting May 12, 2009. Sebia high resolution electrophoresis allows for better separation of electrophoretic bands. The normal ranges for some of the bands will be slightly different. In addition, the better resolution may result in a more accurate estimation of M-protein values; in most cases the M-protein may show a small decrease.

Please forward this to appropriate staff members within your facility. If you have any questions, please contact CML at (402) 280-4382 or Dr. Lisa Tyler 449-4697.

Creighton Medical Laboratories is proud to be your partner in providing effective and timely health care.
